

Crops included in the National Annex (Category 1) by country (May 2021).

Species and species sub-groups for which a sufficient number of varieties from organic propagation is available are assigned to Category 1. The use of organic seed is obligatory. Derogations for the use of untreated, non-organic seed is not normally possible (exceptions for variety trials, basic seed for the production of organic seed, conservation of genetic diversity).

If you notice any inaccuracies, please contact us at seeds4organic@fibl.org.

COUNTRY	Species and species sub-groups in CATEGORY 1	
BELGIUM	Asia-Greens Bean: Runner bean Beetroot Celery: Stalk celery Cress: Garden cress, Winter cress Cucumber Endive Kohlrabi Maize: Grain maize, Silage maize	Onion: Sowing onion Pumpkin: Butternut, Hokkaido Purslane: Winter purslane Radish: Black radish Spelt Swiss chard Triticale: Winter triticale Turnip Turnip tops
