

## Crops included in the National Annex (Category 1) by country (May 2021).

Species and species sub-groups for which a sufficient number of varieties from organic propagation is available are assigned to Category 1. The use of organic seed is obligatory. Derogations for the use of untreated, non-organic seed is normally not possible (exceptions for variety trials, basic seed for the production of organic seed, conservation of genetic diversity).

If you notice any inaccuracies, please contact us at [seeds4organic@fibl.org](mailto:seeds4organic@fibl.org).

COUNTRY	Species and species sub-groups in CATEGORY 1	
BELGIUM	<b>Asia-Greens</b> <b>Bean:</b> Runner bean <b>Beetroot</b> <b>Celery:</b> Stalk celery <b>Cress:</b> Garden cress, Winter cress <b>Cucumber</b> <b>Endive</b> <b>Kohlrabi</b> <b>Maize:</b> Grain maize, Silage maize	<b>Onion:</b> Sowing onion <b>Pumpkin:</b> Butternut, Hokkaido <b>Purslane:</b> Winter purslane <b>Radish:</b> Black radish <b>Spelt</b> <b>Swiss chard</b> <b>Triticale:</b> Winter triticale <b>Turnip</b> <b>Turnip tops</b>
